

Full Endorsement of the Work by C.I.T.
Call for an International Investigation and Criminal Trial
concerning the Events on September the 11th 2001
Clinical Psychologist Christof Lehmann M.Psych

I am a clinical psychologist, psycho-traumatologist, graduated in 1982 from MSU, and have since then had the pleasure to work in many international contexts and for capacities such as His Excellency Mr. Nelson Mandela, His Excellency Mr Yassir Arafat, His Excellency Mr Joshua Nkomo and others. I am mentioning this to clarify that political work, political operations, and the shadow sides of government and secret or permanent government are in no way unknown or surprising to me; including state sponsored and false flag terrorism.

Concerning the work of Citizen Investigation Team. Over a period of six months , I have made relentless attempts to ask questions that would uncover their biasing of witnesses, cherry picking witnesses, and other practices not uncommon; especially not in highly politicized matters. I have viewed "all" their video and audio material, read "all" they have published so far, checked and double checked "all" witness testimony to the best of my ability, and have undertaken all possible attempts to find anything that could discredit their work. Their methodology and integrity is as flawless as one could expect. Their unanswered questions are imminent and demand answers. In conclusion of this I fully and wholeheartedly endorse their work.

In matters as complicated as the events leading up to, during, and subsequent to the perpetration of the horrendous crimes committed on September the 11th 2001 there will "always" be matters that will remain open for discussion, regardless how careful one investigates and persecutes. However; even with many questions being unanswered, the work of C.I.T., the eye witness accounts gathered by them, and the unavoidable conclusion that we have not been told the truth about crimes that have been the basis for railroading populations into wars that may cost millions of lives before they are over are sufficient to necessitate an urgent international, full, and impartial criminal investigation leading to a series of international trials against "who ever" might have been involved.
